

The Light Source

12 inch Mega Truss Pick, 1 ton

The Mega-Truss Pick is CNC machined from solid 1" x 6" 6061 T-6 aluminum billet. Two pockets cut into the Mega-Truss Pick have coupler style aluminum pivoting links, half inch swivel bolts, and our solid wing nuts to completely wrap around the truss tube to secure it.

The Mega-Truss Pick has one top and one bottom rigging hole for attaching the truss to a shackle, motor, or chain hook. The Mega-Truss Pick will suspend up to one ton of truss load, plus an additional one ton load suspended under the truss. The Mega-Truss Pick weighs less than 4 pounds for the 12" truss version. Fits 5/8" Shackle and larger. Other models are available for 16", 18", 24", and 30" truss.

Please note that these do not fit a Global Truss or Applied Truss. See Global Truss Picks for correct part # to order. For Applied Truss you will need to call us with specifications.

Safe Vertical	1 ton truss / 2 ton total
Working Load	
Hardware	1/2"-13 steel swivel eyebolts, with our solid aluminum wing nuts.
Dimensions	1" thick x 6" tall x 13-3/8" long Single Hole (actual hole)- 1.5" wide Multi Hole (actual hole)- 5/8" wide
Weight	4.15 lbs
Case Quantities	each
